- Thicknesses : 1.00 mm (other thickness available on request)
- Notes
- All tests may not be valid for metallic and gloss laminates.
 - Samples pasted, represent only color, pattern and finish and not actual thickness.
 - There may be slight variation in shades in batch to batch, particularly in metallic designs.
 - Bonding of laminates under high humidity, plywood with high moisture content, ply with uneven surface, inferior quality adhesive and insufficient pressure may lead to delamination/ air bubbles in between ply and laminate.

Do not use chemicals
for cleaning

Extra care required in vertical
pasting of laminates sheet as
there is possibility of bubbles due
to lack of uniform pressure

Avoid direct sunlight/
continuous light. These
may cause color fading

Cracking at corners and
around cuts may be caused by
improper conditioning,
improper bonding, and poor
planning. Avoid all these to prevent
cracking at corners.
